by Sociology Group. Consumption may often be seen as the purchase and use of goods and services, however, when we talk about consumption in the social context it is much more than just the purchase and use of products. Consumption is at all times related to one’s identity, social status and a part of one’s daily life
which will determine where one stands in the society.

In sociology, consumption is about so much more than just taking in or using up resources. Humans consume to survive, of course, but in today's world, we also consume to entertain and amuse ourselves, and as a way to share time and experiences with others. We consume not only material goods but also services, experiences, information, and cultural products like art, music, film, and television.

Definition of Consumption within Sociology

Since the late 1960s, the social science of consumption has had three broad, partly overlapping, phases of development, each of which has had a distinctive focus. Schematically, emphasis shifted between the three fundamental dimensions of
consumption – acquisition, appreciation and appropriation (see Warde, 2010).
